1	<b>Representations of 3D shapes</b>	<p><b>Faces = flat surfaces</b>  <b>Edges = sides/lengths</b>  <b>Vertices = corners</b></p> <p>Plans and elevations are a way of representing a 3D-dimensional object.            We have three views of the 3D shape:</p> <ul style="list-style-type: none"> <li>From the front of the shape, called the <b>front elevation</b></li> <li>From the side of the shape, called <b>side elevation</b></li> <li>From above looking down on the shape, called the <b>plan view</b>.</li> </ul>	 <p>A cube has 6 faces, 12 edges and 8 vertices.</p>	U719, U743.
2	<b>Pythagoras' Theorem in 2D</b>	<p>For any <b>right angled triangle</b></p>  <p>Used to find missing lengths.            a and b are the shorter sides,            c is the <b>hypotenuse (longest side)</b>.</p> $a^2 + b^2 = c^2$	 <p>Finding a Shorter Side</p> $a^2 = c^2 - b^2$ $y^2 = 100 - 64$ $y^2 = 36$ $y = 6$	U851, U385, U325.
3	<b>Ratio</b>	<p><b>Simplifying ratios</b> is a way of using <b>common factors</b> to divide all the numbers in a ratio until they cannot be divided further.</p> <p><b>Dividing ratios</b> is a way of sharing a quantity in given parts of a ratio.</p>	<p>Simplify 45 : 75</p> <p>HCF of (45, 75) = 15</p> $45 : 75 = 45 \div 15 : 75 \div 15$ $= 3 : 5$ <p>Share the amount £120 in the ratio 1:4:1:4.  <b>Add the parts of the ratio together.</b> 1+4=5  <b>Divide the quantity by the sum of the parts.</b> 120÷5=24  <b>Multiply the share value by each part in the ratio.</b>      24×1=£24 24×4=£96 Answer, £24:£96</p>	U529, U687, U577.
4	<b>Ratio word problems</b>	<p><b>Ratio problem solving</b> is a collection of <b>word problems</b> that link together aspects of <b>ratio and proportion</b> into more <b>real life</b> questions. This requires you to be able to take key information from a question and use your knowledge of ratios (and other areas of the curriculum) to solve the problem.</p>	<p>For example</p> <p>A bag of sweets is shared between boys and girls in the ratio of 5 : 6.</p> <p>Each person receives the same number of sweets. If there are 15 boys, how many girls are there?</p> <p>(18)</p>	U926, U721, U357, U610
